V209. Weight variable.

Provide a 4-digit weight variable here to correct your sample to reflect national distributions of key variables. If no weighting is necessary, simply code each case as "1.00" (coded as "100" since it will be assumed that the last two digits of this variable are to the right of the decimal point). It is especially important to correct for education. For example, if your sample contains twice as many university-educated respondents as there are in the adult population as a whole, members of this group should be given a weight of .5 (coded as "50").
